**Section: How to use Stockcharts.com to find trading setups**

**Code 7:**

We noticed that some strong stocks dropped right into support of the 50 Day Moving Average and managed to hold. But the scan returned several weak stocks that dropped under the 50 Day Moving average.
In previous lessons we discussed two criteria to apply to get rid of those weak stocks:

```
[type is stock] and
[country=usa] and
[market cap > 1,000] and
[sma(20,volume) > 400000] and
[close>10] and
[close > sma(50,close)] and
[today's sma(50,close) > 10 days ago sma(50,close)]
[max(20,high)=max(80,high)] and
[max(20,rsi(14,close))>=68] and
[low <= sma(50,close)] and
[min(10,rsi(14,close))>=38] and
[min(10,close) >= min(10,sma(50,close))]
```
